Chromatography, 270–273
Coal-derived products
Structural analysis, 390–396
Combustion of coal
Calcium, 75–80
Petroleum
N.m.r., 142–143
Thermogravimetric analysis
Crude oil, 1684–1687
Supercritical
Extraction
Peat, 274–276
Surface deposition
Coke, Catalysts, 1396–1399
Gasification of carbon
Catalyst, 1383–1387, 1392–1395
Catalysts, 1377–1382
Surface properties
Ash
Coal, 991–996
Coke, Fractal analysis, 1759–1762
Scanning electron microscopy
Macerals in coal, 277–280
Swelling
Coal, Amine, 298–299
Physical behaviour, 1171–1173
Plastic properties, 725–731
Surface water, 1614–1615
Plastic coals
Potassium, 1291–1299

Tar
Coal
Hydropyrolysis, 945–948
Pyrolysis
Crude oil, 202–207, 208–211
Tar sand
Bitumen
Electron spin resonance, 1594–1597
E.p.r.
Chemical characterization, 1610–1612

FT–i.r., Mineral matter, 1261–1264
Thermal analysis, Asphalt,
Diagnostic probes, 987–990
Gas oil, Electric spark, 869–872
Thermogravimetric analysis
Analysis of coal
Char, 844–848
Coal, Composition, 636–639
Solid and molten catalysts, 922–926
Hydropyrolysis
Catalysis, 1457–1461
Oxidation of coal
Combustion, 1546–1551
Sulphur
Crude oil, 1684–1687
Thin layer chromatography
Coal-derived liquid,
Flame-ionization detection, 421–424
Trace elements
Coal
X-ray emission spectroscopy, 1099–1102
Tribute: H. Jüntgen, 887

Viscosity
Coal
Oil, 1658–1663
Volatile yield
Carbon, Coal characterization, 140–142
Coal
Combustion of coal, 640–643

Wettability
Graphite, Alkanes, 113–116
Pitch
Coke, 281–287
Wood
Carbonization
Gasification, 1709–1713

X-ray
Coal
Analysis of coal, 547–551
X-ray emission spectroscopy
Coal
Trace elements, 1099–1102
